Creator's Note

Hi there! Thanks for purchasing this script! I hope you enjoy this script and find it useful! This script was derived from an open source code snippet archive online. I took the code apart and expanded it, added on to it, created graphics and modified the CSS file for it. It grew from a basic 1-page script to a full-blown 4-page script with an admin section.

Nonetheless, the Idea Bucket is a simple script and I can almost guarantee that you'll find it extremely easy! This script was created for those moments when the ideas are pouring out your ears and you need to get them down onto paper or, in this case, into the 'notes.txt' file. I will have accomplished what I set out to do if you also find it as useful as I have!

I would love to hear your thoughts on the Idea Bucket. You can contact me through my helpdesk at http://www.original-eproducts.com/helpdesk

Enjoy!

Regards,

Kim Enders

Distribution Notice

This Ebook does not come with resell rights unless you received a resell rights certificate with it!

IMPORTANT!

If you purchased this Ebook:

- After being **spammed** for it.
- After receiving it for free.

Please contact me immediately at kim@original-eproducts.com You will be rewarded! I appreciate your attention to this matter. Thanks and best wishes to you!

Installation Details

1) In 'secure.php', replace the 'password' with a password of your choosing. You'll see the exact string you need to look for and replace below.

'$pass   = 'password';

Clarification: Let's say you want to use Apples504 as your password, the string above would look like this: '$pass   = 'Apples504';

2) Upload all files to a web folder of your choice. Make sure to upload text, css and PHP files in ASCII mode and picture files in binary mode.

3) CHMOD the 'notes.txt' file to 777.

4) Log in at: http://www.yourdomain.com/installfolder/admin.php
Of course, you'll have to change 'yourdomain' to your actuall domain name and 'installfolder' to the name of the folder you uploaded the script files to.

Planned Feature Upgrades

- Search Utility
- An HTML editor for posts
- Ability to comment on ideas (basically, add notes.)
- More to come!

Getting Around in Idea Bucket

Using Idea Bucket is really simple. You'll find the Add Idea, Delete Idea and View Ideas options right there on the admin page.

If you can click a button, you should have ABSOLUTELY no problems using Idea Bucket!

In the unlikely event that you do run into any issues, please open a ticket at Original-Eproducts.com's helpdesk. You can access the helpdesk at:
